

DESCRIPTION

FROM THE FRONT THIS FABRIC POSTER DISPLAY APPEARS COMPLETELY FRAMELESS

- The KS90AF45 extrusion is 90mm wide and forms an illuminated light box fabric poster frame
- Dimensionally stable and universally applicable for a host of uses
- Can be mounted in any indoor location, including retail wall space and trade show exhibition systems
- Only a 90mm (depth) section of aluminium extrusion is seen from the side
- Image extends from edge to edge, covering 100% of the space used
- Different lighting options include Penta Wide and back lit EdgeMax options for back lighting
- Edge lit panels can also be used if necessary
- LEDs are normally placed on the 2 long sides for units up to 2m wide
- For units up to 3m wide 2 strings of TE EdgeMax LEDs are placed on each long side
- For brighter light boxes LEDs can be placed on all 4 sides
- Colour option: Silver
- Custom colours are also available

SPECIFICATIONS

- 90mm deep
- 49mm wide at the rear
- Sizes from A4 up to 10x3m
- LED strips or matrix
- LED system only uses 33% of the electricity of a traditional fluorescent lighting system
- LEDs will outlast the fluorescent tubes 5 times
- LEDs produce very little heat
- Can be delivered in kit form, thus saving space and money for packaging and shipping
- Extruded profiles are joined together with easily fitted screw corners
- Fabric print is held in place by silicone beading which is stitched along the perimeter of the stretch fabric
